CURRENT PRICE	FAIR VALUE	UPSIDE / DOWNSIDE	MARKET CAP
$424.62	$259.79 Discounted Cash Flow (Free Cash Flow to Firm) — 2-stage model	-38.8%	$3,153.1B

Summary — The stock is overvalued, with a fair value of $259.79, implying a 38.82% downside from the current price of $424.62.

WACC / COST OF EQUITY	9.71%	EV / EBITDA	18.2x
ENTERPRISE VALUE	$1,942.0B	P / E	31.0x
VALUATION MODEL	DCF_FCFF	P / S	11.2x

Investment Thesis

Bull Case

The stock could be driven significantly higher if the company exceeds its projected revenue and free cash flow to firm (FCFF), particularly if it can maintain its operating margin of 0.$4562.2T and continue to grow its revenue at a rate similar to or higher than its projected rates, such as $301.1B, $348.3B, $400.3B, $443.5B, and $472.96B over the next five years.

- Exceeding projected revenue growth
- Maintaining or improving operating margin
- Increasing free cash flow to firm

Base Case

The most likely scenario is that the stock will trade at its fair value, which is $259.79, implying a -38.82% downside from the current price of $424.62, as stated in 'Fair value implies a 38.82% downside from the current price.'

Fair value implies a 38.82% downside from the current price.

Bear Case

The stock could experience significant downside if the company fails to meet its projected revenue and FCFF, or if its operating margin and WACC are negatively impacted, leading to a decrease in its enterprise value of $1.94T and equity value of $1.93T.

- Missing projected revenue and FCFF targets
- Decrease in operating margin
- Increase in WACC

Key Catalysts

- Earnings reports
- Revenue growth announcements
- Changes in WACC or operating margin

SENSITIVITY — WACC × TERMINAL GROWTH

> **How to read:** each cell is the model's fair value per share under a different combination of WACC (row, discount rate) and terminal growth (column, long-run growth beyond the forecast window). Green = above current price (upside); red = below (downside). Baseline is the cell at the center row/column. Computed Python-side by re-running the DCF over a 5×5 grid — no LLM.

Method	Implied Fair Value
Ev Revenue Implied	$346.92
Pe Implied	$427.45
Pb Implied	$463.95

Peer Comparison & Industry Context

Source: EV/EBITDA ratio for each peer, pulled live from yfinance. The target ticker is highlighted in orange; the dashed red line is the median across the peer set. Peers are selected by GICS sector/sub-industry match (computed Python-side). A bar above the median suggests relative premium valuation; below the median suggests a relative discount on this multiple.

Peer Set

Ticker	EV/EBITDA	P/E	P/S
AAPL	26.2x	34.4x	—
GOOGL	27.3x	31.9x	—
META	16.8x	28.7x	—
NVDA	37.6x	42.6x	—
CRM	13.8x	22.8x	—
ADBE	10.4x	14.3x	—
ORCL	22.8x	31.2x	—

Competitive Positioning

MSFT stands relatively well among its peers in terms of valuation multiples, with its EV to Revenue and EV to EBITDA ratios being closer to the median values. However, its PE ratio and Forward PE are slightly above the median, indicating a potential premium.

STRENGTHS

- MSFT has a strong price to book ratio compared to some of its peers like AAPL and NVDA, indicating potentially more reasonable valuation on this metric.

WEAKNESSES

- MSFT's profit margin is not explicitly provided for comparison, but its valuation multiples like PE ratio and Forward PE are above the median, which could indicate overvaluation relative to peers.

- MSFT's revenue growth rate is not provided, making it difficult to assess its growth prospects relative to peers.

Shareholder Meeting & Material Events

Sourced from SEC EDGAR filings (DEF 14A proxy statements and Form 8-K).

Shareholder Meeting (DEF 14A)

Filed Oct 21, 2025 — Accession 0001193125-25-245150

MEETING DATE	**2025-12-05**
EXECUTIVE COMP.	**Over 95% of CEO's target compensation is performance-based**
GOVERNANCE	**Independent Board, annual director elections, majority vote**

VOTING PROPOSALS

- Elect 12 directors
- Approve named executive officer compensation
- Ratify Deloitte & Touche as auditor
- Approve 2026 Stock Plan
- Six shareholder proposals

DIRECTOR NOMINEES

Reid G. Hoffman, Hugh F. Johnston, Teri L. List, Catherine MacGregor, Mark A. L. Mason, Satya Nadella, Sandra E. Peterson, Penny S. Pritzker, John David Rainey, Charles W. Scharf, John W. Stanton, Emma N. Walmsley

Risks

Overall Risk Rating: MEDIUM

Microsoft Corporation's risk profile is primarily driven by financial risks related to valuation and potential downside. Operational, market, macro, and ESG risks appear to be relatively low based on the provided data.

Financial Risks

Risk	Severity	Likelihood
High enterprise value and equity value may indicate overvaluation	**MEDIUM**	MEDIUM
Negative upside percentage implies potential downside risk	**MEDIUM**	MEDIUM

Operational Risks

Risk	Severity	Likelihood
Operating margin pressure due to high operating margin assumption	**LOW**	LOW

Market Risks

Risk	Severity	Likelihood
No direct market risks identified from provided data	**LOW**	LOW

Macro Risks

Risk	Severity	Likelihood
Interest rate sensitivity due to WACC	**LOW**	LOW

Automated QC Check

FLAGS FOUND — The valuation results for MSFT indicate several potential issues, including unrealistic growth assumptions, an unreasonably high WACC, and an outsized terminal value. Further review and analysis are recommended to ensure the accuracy and reliability of the valuation model.

Issue	Severity	Detail
The implied per-share fair value is not reasonable given the per-share current price.	HIGH	The valuation implies a 38.82% downside from the current price, which may be unrealistic.
The growth assumptions may be unrealistic.	MEDIUM	The projected revenue growth rate is 0.732, which is relatively high and may be difficult to sustain.
The WACC is not in a reasonable range.	HIGH	The WACC of 9.71% is above the typical range of 6-14%.
The terminal value is an outsized portion of total value.	HIGH	The terminal value is approximately 117% of the equity value, which may indicate an issue with the valuation model.
The valuation multiples may not make sense for the sector.	MEDIUM	The EV/Revenue multiple of 10.433 is relatively high compared to the sector average.
